Company Introduction

KINGWOOD® COMPOSITE TIMBER SOLUTIONS /

Supplied by Australia National Building Material Pty Ltd (ANBM) to Australian Market

Being as the Exclusive Agent of LESCO KINGFA, the pioneer of WPC manufacturer from China, ANBM is the sole importer and wholesaler specializing in supplying Kingwood composite timber products for commercial & residential applications throughout Australia.

Guangzhou LESCO-KINGFA WPC Technology Co., Ltd is a leading manufacturer and pioneer in the research, development and marketing of long lasting, low-maintenance, high quality wall cladding, ceiling and sun shading solutions since 1997.

With the sound technical support and quality products backup from the manufacturer, Kingwood has completely finished all the testing and successfully developed the installation method which conforms to Australia BCA.

It is our objective to provide cost effective, environmentally friendly, affordable and cutting edge green composite timber solutions to the commercial & residential construction market.

Product Background

KINGWOOD COMPOSITE TIMBER Exterior Cladding

KINGWOOD Exterior wall cladding is designed specifically for outdoor application requirements. While maintaining the natural wood texture, KINGWOOD exterior cladding also focus on solving the special requirements of outdoor building environmental applications, such as energy-saving, material-saving,

anti-UV, anti-aging and anti-deformation. Having a 0.2 R value KINGWOOD Cladding is more thermal efficient than most claddings on the market. It has become probably the first environmentally friendly wooden product which can meet the requirements of external application requirement

KINGWOOD COMPOSITE TIMBER Interior Cladding

KINGWOOD Interior cladding offers a tremendous range of architectural decorative features and functions. The characteristics include: consistency, durability, low maintenance. Each panel is equipped with air pockets which offer an additional insulation layer, thus adding a great thermal and acoustic blanket to your building. With no two panels being alike, KINGWOOD Interior Wall Cladding creates a true aesthetic timber appeal.

KINGWOOD COMPOSITE TIMBER Ceiling

KINGWOOD Ceilings can be used in both commercial application and residential buildings. KINGWOOD Ceilings set themselves apart from other ceiling products in showing its uniqueness with odd-shaped designs, the variation of the profiles width and heights, the mixture of the aesthetic real timber colors, which ultimately leads to a cost and labor efficient ceiling system.
